SKILLS

- Linux (Red Hat, Ubuntu): system administration, troubleshooting, and hands-on lab practice
- Python Development: scripting, automation, and small application development
- SQL: writing queries for data retrieval, filtering, and basic database operations
- Ansible: automation and configuration management in lab environments
- AWS (Lab): IAM, EC2, and basic cloud infrastructure setup
- Docker: containerization using Dockerfiles, image creation, and deployment
- Networking & IT Support: basic networking (IP, DNS, connectivity), Active Directory, and ticketing systems
- Infrastructure Concepts: DNS (records, BIND9), load balancing, reverse proxy, high availability (HA), HAProxy

LANGUAGES

- English (very good)
- arabic (native)

PROFILE

IT professional with hands-on experience in help desk support and basic system administration. I work comfortably with Linux (Red Hat, Ubuntu), basic networking, and troubleshooting everyday technical issues. I also use Python for scripting and automation tasks, along with basic Python development.

I have foundational experience with cloud tools like AWS (IAM, EC2) and container basics using Docker. I'm especially interested in cloud computing, system administration, automation, Python development, and AI, and I enjoy learning through practical, real-world projects

WORK EXPERIENCE

Neo iraq -fintech 2024- 2026
IT engineer - help-desk

- Provided technical support to internal and remote users, ensuring timely resolution of IT issues
- Installed and configured workstations, software, and antivirus solutions
- Managed users and computers in Active Directory, including basic Group Policy configuration
