SKILLS

- Linux (Red Hat, Ubuntu): System administration including permissions, process management, LVM, SELinux, firewall configuration, systemd/journalctl logging, package installation, configuration, and troubleshooting
- Windows Active Directory: User and computer management, Group Policy (GPO) configuration, Organizational Unit (OU) design, domain administration, and replication basics
- Docker: Containerization, image creation, Dockerfile development, and Docker Compose for multi-container applications
- Databases (SQL): Basic SQL queries, data retrieval, filtering, and database operations
- Automation: Python scripting, Ansible configuration management, and workflow automation using n8n and Make
- AWS (Basic): IAM, EC2 provisioning, and basic cloud infrastructure management
- Networking & Infrastructure: DNS record management, MikroTik and Cisco networking, VLAN configuration, DHCP, and basic network troubleshooting

LANGUAGES

- English (very good)
- arabic (native)

PROFILE

IT professional with experience in technical support, IT operations, and infrastructure administration. Skilled in troubleshooting Windows and Linux systems, managing user accounts, supporting network connectivity, and resolving day-to-day IT issues. Hands-on experience with Linux (Red Hat, Ubuntu), AWS (EC2, IAM), Docker, and Python scripting for automation. Dedicated to ensuring system reliability, operational efficiency, and excellent user support while continuously expanding expertise in system administration and cloud technologies

WORK EXPERIENCE

Neo iraq -IT engineer

2024- 2026

- Delivered technical support to on-site and remote users, ensuring timely resolution of hardware, software, and network-related issues.
- Installed, configured, and maintained workstations, operating systems, business applications, antivirus solutions, and endpoint security tools.
- Administered user accounts, permissions, and computer objects in Active Directory, including basic Group Policy management.
- Performed security-related tasks such as antivirus deployment, malware detection and removal, endpoint protection monitoring, and security compliance checks.
- Configured, monitored, and maintained CCTV systems, printers, and other critical office infrastructure.
- Managed and supported network infrastructure using MikroTik and Cisco devices, including basic routing, switching, and connectivity troubleshooting.
- Utilized ticketing and monitoring systems to track incidents, prioritize requests, and maintain service quality.
- Coordinated with vendors for hardware procurement, maintenance, and issue resolution to ensure business continuity.
- Provided end-user training on security best practices, safe system usage, and cybersecurity awareness.
- Documented technical procedures, system changes, security controls, and troubleshooting steps to support operational efficiency and knowledge sharing.
- Supported IT operations within a fintech environment, contributing to system reliability, infrastructure security, and uninterrupted business services.

EDUCATION

Bachelor's Degree in Computer Engineering

2016 - 2019

Al-Farabi University College

COURSES & TRAINING

- CCNA → Training — MK.NET for IT Solutions
- Docker — Linux Academy
- RHCSA → Training — Sander van Vugt
- AWS → Training — Udemy
- Python Programming — Udemy
- Introduction to AI & Machine Learning — Udemy
