SUMMARY

Computer Engineering graduate who supports users and keeps systems and networks running day to day. I'm quick at tracking down hardware, software, and network problems, and I take security seriously. On my own time I'm going deeper into networking and Linux to move toward a Network and System Administration role.

TECHNICAL SKILLS

Cisco & MikroTik Networking

Network Troubleshooting

TCP/IP · DNS · DHCP

Active Directory

Linux Administration

Windows Server

System Maintenance & Monitoring

Hardware & Software Troubleshooting

User Training & Security Awareness

SQL

AI Tools & Automation

EXPERIENCE

IT Engineer

Nov 2024 – May 2026

NEO Iraq · Fintech

- First point of contact for users, resolving hardware, software, and network issues.
- Handled basic administration on Windows systems following security best practices.
- Kept the office Wi-Fi and network running reliably, troubleshooting connectivity issues.
- Managed Active Directory accounts, shared folders, and access permissions.
- Ran regular backups and used monitoring tools to keep systems healthy.

PROJECTS

On my own time I build small projects and work through labs in Python, AI integration, and automation — mostly because I enjoy it and like understanding how things actually work.
