SUMMARY

IT Engineer with a Bachelor's degree in Computer Engineering (2019). After working in a different field following graduation, I returned to IT in 2024 and have since gained hands-on experience with systems, servers, and IT infrastructure. I continuously improve my skills through practical work and self-learning, with a strong interest in programming and system internals. My long-term goal is to grow into a DevOps Engineer role and contribute to building reliable, scalable systems.

EXPERIENCE

IT Engineer

NEO Iraq

11/2024 - 05/2026 In-office

- Provided technical support in a fintech environment while ensuring system security, maintaining IT operations, and resolving hardware, software, and network issues.

PROJECTS

Expense Tracker

A modern, user-friendly web application for tracking personal expenses. Built with Flask
