SUMMARY

IT Engineer with a Computer Engineering degree (2019). After working in a different field after graduation, I returned to IT in 2024 and have since built strong hands-on experience in systems, servers, and infrastructure. I continuously improve my skills through practical work and learning, with a strong interest in programming and system internals. My goal is to grow into a DevOps Engineer role.

EXPERIENCE

IT ENGINEER · NEO IRAQ Nov 2024 – May 2026

- Provided daily technical support to users, resolving tickets both remotely and on-site
- Diagnosed and resolved hardware and software issues for workstations, printers, and fingerprint devices
- Managed routers and Wi-Fi networks for end users
- Troubleshoot network connectivity issues and diagnosed related problems
- Monitored server health and performance (CPU, RAM, disk usage)
- Installed, configured, and maintained antivirus protection across endpoints
- Managed and monitored CCTV surveillance systems
- Worked with storage systems
- Contacted vendors and managed IT department purchase requests
- Escalated unresolved issues to relevant teams
- Documented issues and solutions for future reference
